SKILLS

Languages: Java, Javascript, Python, C, SQL
Technologies and Tools: ReactJS, Spring, Docker, Firebase

EDUCATION

Sharda University, Greater Noida B.E. in Computer Science in Engineering	Aug 2023 - Jun 2027 CGPA: 8.53/10
Kailash Chandra Memorial School, Moradabad (CBSE)	2022-2023 | 86%

PROJECT WORK

Disney+ Clone: Developed a Disney+ clone using ReactJS, Firebase, and React Redux, featuring pagination, secure authentication, and a visually similar UI. Engineered seamless user interaction and functionality, ensuring a compelling user experience.
ReactJS, React Redux, Firebase, OMDB API

Chatting App: Developed a real-time chat application with ReactJS and Firebase, facilitating both one-to-one and group conversations. Engineered a responsive and intuitive interface, fostering seamless communication experiences for users across various chat environments.
ReactJS, React Redux, Fireabse, Socket.IO

Spring Verify: Developed an email verification API utilizing Java Spring and SMTP server, ensuring seamless account activation for users upon signup. Implemented a secure workflow where user accounts are initially created as inactive, triggering an email containing an activation link. Upon user interaction with the link, accounts are activated, enhancing user security and account management.
Java Spring, SMPT, Rest API

SUMMARY

First-year engineering student eager for internships, passionate about full-stack development and DevOps.
